INDIKIN

The Creative Home for
Independent Filmmakers

ETHEREUM SEED ROUND

The Ecosystem where filmmakers stream, earn, and own their future.

Powered by DeFi and AI.

Bring the liquidity. We'll bring the filmmakers.

The system is broken — and breaking further.

UNEQUAL VALUE EXTRACTION

YouTube, Netflix, TikTok generate billions. Less than 10% of creators earn a sustainable income. Over 90% of independent films never reach profitability.

NO OWNERSHIP

Algorithms control visibility. Studios own IP. Exploitative contracts siphon value before it ever reaches the people who create the art.

THE WINDOW IS NOW

AI is democratising film production. The creator economy is hitting an inflection point. The old gatekeepers are losing their grip. Infrastructure is needed urgently.

THE SOLUTION

One ecosystem.
Everything a filmmaker needs.

INDIFLIX

Native streaming platform with smart contract-based revenue splits. Automated, transparent payouts — no middlemen.

TOKEN INDEX

Every filmmaker has their own token. The Indikin Token Index bonds them together, driving discovery, community and collective exposure.

TOOLS & NETWORK

AI production tools, organisational automation, plus a global network of crew, talent, equipment and service partners — everything in one place. (In development)

PRODUCTION FUND

Trading activity across the Index feeds the Production Fund — a decentralized grant and scholarship engine that flows directly back to filmmakers.

Born from a Documentary. Proven on PulseChain.

Production Fund

810
$INDIKIN + Filmmaker Token Holders

$12K
Index Liquidity on PulseChain

Now Coming to Ethereum.

An intelligent Index, engineered for the Production Fund.

HOW IT WORKS

01 Filmmakers launch individual tokens, bonded to the $INDIKIN native token on Ethereum.

02 All bonded tokens form the Indikin Filmmaker Token Index, a living index of the ecosystem.

03 AI agents monitor the Index, balance liquidity, and extract value on behalf of filmmakers into the Production Fund.

04 The Production Fund distributes grants and funding directly to filmmakers.

GOVERNANCE

Time-Locked Multi-Sig Model

- AI agents operate within founder-defined parameters
- Parameters secured by multi-sig wallet — requires multiple founder sign-offs to change
- All changes subject to mandatory time delay before taking effect
- Full on-chain transparency — every decision is publicly visible
- Designed to inspire DeFi-native investor confidence

MARKET OPPORTUNITY

97% of independent films never turn a profit. The value is being created, it's just not reaching the people who made it.

TAM

$48–96B

10–20% of Creator Economy — filmmakers, independents & Web3 creators

207M creators globally

SAM

$12–18B

Independent film production & distribution market (~$10–15B)

Plus Web3 creator/NFT media space (~$2–3B)

SOM

$500M

Captured in 3–5 years representing ~1–3% of the defined SAM

Based on 5,000+ filmmakers onboarded

The money exists, streaming platforms, audiences, distribution, but the extraction layer between creation and creator captures nearly all of it. That's exactly the gap Indikin is positioned to fix.

THE TEAM

Built by people who live at the intersection of Film, DeFi and AI.

RICH TELLA

COO & Co-Founder

- 11+ years building & launching blockchain projects via Bitjoin Studios
- Creator of Tom Gillespie character & the GDAY token — the origin story of Indikin
- Former Creative Director, ChromaWay (blockchain 2.0 pioneers)
- Co-founder, Qwids — token-based community loyalty platform
- BA Fine Arts, University of Plymouth

MICHAEL PARENTI

CEO & Co-Founder

- 35+ years in communications, media, TV production & digital media
- Contributor to Ethereum, Bitcoin, Monero community events.
- Alumni: Bitcoin Foundation, Status.im, Sovryn, Trustlines, Mattereum
- Co-founder, Bitcoiners Without Borders — IT infrastructure for crypto NGOs
- BA International Relations, Pepperdine University

AHMED KALLEL

CTO & Co-Founder

- Co-founder & General Manager, YalaCoins (2018–present)
- Crypto-native technical co-founder with Gulf region reach
- Background in blockchain, cryptocurrency & full-stack web development
- Previous senior advisory & operations roles in Riyadh & Kuala Lumpur
- BSc Information Technology & Computing

REGAN MILNE

AI Infrastructure & Co-Founder

- Builder of Obsideo — encrypted portable memory infrastructure for AI agents
- Creator of MLVault & MLflow Storage Integration for decentralized ML artifact storage
- AI agent memory persistence — Claw-Store Skill in the OpenClaw ecosystem
- Specialises in bridging ML infrastructure, agent frameworks & decentralised storage
- Operational background in safety-critical energy infrastructure

MEET THE AGENTS

All agents operate within founder-defined iterative parameters.

MARKA

Marketing Agent

ONBA

Filmmaker Onboarding

MODRA

Content Moderator

COMA

Community & AMA

INDEXA

Index Manager

FUNDA

Production Fund

DEVA

Developer Agent

ANALYXA

Analytics & Reporting

THE ASK

Raising $10M to bring Indikin to Ethereum.

HYBRID ROUND — Token + Equity

Tokenomics TBC — details to be confirmed by the founding team.

HOW CAPITAL IS DEPLOYED

Ethereum Liquidity Ramp

Seeding the Indikin Token Index on Ethereum with meaningful liquidity depth from day one.

Marketing & Community

Targeted campaigns into the Ethereum and DeFi-native communities. Activating Michael's network.

Team Buildout

5 full-time hires within 3–6 months across engineering, marketing, and ecosystem growth.

AI Tool Development

Building out the AI agent (Index management), internal ops automation, and filmmaker creative tools.

GET IN TOUCH

Let's build together.

Bring the liquidity. We'll bring the filmmakers.
